

Dear fellow members of EUD,

My name is Flavia and I am running for a regular board member position.

I am one of the newer members of the organization, as I joined in September 2017. Despite this, I have been a board member of European Youth North since then, as well as generally active in the organization, taking part in almost all events organized in the previous semester. Currently, I am the Organizational Vice President of EUN. I had been part of another pro-EU volunteering organization for four years, throughout high school, where I had taken part in organizing events and informational campaigns about the European Union.

Besides my previous activity in EUN, I have also been writing various articles for the local media as well as for *The New Federalist*. When it comes to my international experience, I had been an observer and a teller at the 24th European Congress in Malta.

I can bring my five years experience in event organizing, a fresh perspective, and new ideas. I decided to run for this position because I enjoy being part of this organization and I wish to work in developing it further. I believe we need to aim higher when it comes to the effect and influence we as an organization can have on the civil society and its development. We should go for bigger, long-term projects that can bring us more visibility. For example, I pushed for Aalborg to run for European Youth Capital 2021 with European Youth North as supporting youth organization.

I would also like to work on ensuring that there will be more collaborations between the local sections, strengthening our position as a pro-EU, pro-federalist youth organization on the national level. I hope you will decide to accord me your trust and allow me to work for the betterment of the organization.

Federalist regards,

Flavia-Gabriela Sandu
